00:00 (upbeat music)
00:03 - It's commonly referred to as Fintech,
00:06 but the full name is Financial Technology.
00:09 And it's recently become a really disruptive
00:11 force in finance.
00:13 So in that concentration,
00:15 if you choose to work on it, you are basically
00:18 combining finance with advanced, modern technology
00:23 and specifically you are going to be
00:25 learning some programming so students
00:28 will be learning how to apply machine learning software,
00:32 looking into MATLAB or it could be Python
00:36 and then doing various application
00:38 and different financial settings.
00:41 And, you know, as a result,
00:43 the skillset is all the finest knowledge that you take
00:46 from your other finance courses.
00:48 But then you're looking into it
00:50 from a programming perspective as well,
00:52 and then respect of your skillset is quite technical
00:55 and you're prepared for a wide range of
00:57 advanced analytical positions.
01:00 (gentle music)
