Dear student,

It is Suffolk University Madrid Campus policy that our students are covered by an insurance policy that allows immediate medical assistance without having to pay any bills before, during or after the event. The most efficient way we have found to comply with this policy is that our students are covered by a local health insurance provider. The provider used by SUMC is SANITAS.

The only case in which we may, at SUMC discretion, waive this mandatory health insurance and subsequent fee, is when students have a similar coverage by a insurance company of their choice. In order to apply for this waiver, the student must provide a copy of the policy, or a written statement from the insurer, clearly stating that no payments will have to be made by the student (should be named in the document) to the health service provider (physician, hospital or others) in case he or she needs medical assistance. Once this policy or statement has been forwarded to the Suffolk Madrid Business Office, we will review it and determine whether or not the waiver is applicable. In this regard, any policy that requires previous payment by the student (even if this is later reimbursed by the insurer), would automatically be NOT eligible for a Health Fee waiver.

Thank you for your consideration to this matter and if you have any questions please let us know.

Best wishes,

L. Elizabeth Baile
